

# UNDER CONSTRUCTION

## Short-term, long-term closures to start Monday

Construction of State Route 210 near the Route 30/Interstate 215 interchange in San Bernardino will require both short-term and long-term lane and ramp closures in this area, starting March 28. The following closures are based on current construction schedules and may change, due to weather.

**Short-term closures** will occur March 28-April 1, from 9 p.m. to 5 a.m. Crews will be placing concrete K-rail barriers and re-striping lanes on Route 30 and I-215 to prepare for upcoming work on the new Route 210. The following closures will be staggered throughout the week and will not occur simultaneously:

- Northbound and southbound I-215, alternating outside and inside lanes
- Westbound Route 30 lanes (alternating between the two lanes) from Miramonte Drive to Highland Avenue
- Eastbound Route 30 on-ramp from Highland Avenue, and the southbound I-215 loop ramp to eastbound Route 30
- Eastbound Route 30 loop ramp to northbound I-215

**Long-term closures** will include:

- Southbound I-215 off-ramp to westbound Highland Avenue/Route 30, for a period of 18 months. This closure originally was scheduled for March 13 and now is set to start March 28..
- Closure of one westbound lane on Route 30 between Miramonte Drive and Highland Avenue, for a period of 18 months. One westbound lane and two eastbound lanes will remain open through this area. This lane closure will start after the short-term closures are completed.

Drivers should allow extra travel time, follow signs and posted detours and drive carefully through construction areas.

## Utility work to require night closure on Highland

Highland Avenue will be closed at night between Riverside Avenue in Rialto and Macy Street in San Bernardino for utility relocation, March 28-April 1. The closure will be in place from 8 p.m. to 5 a.m. The street will re-open each morning with steel plates placed over the trench to allow day-time travel. Drivers should use California, Riverside and Baseline as alternate routes.

This work was rescheduled from March 21-25, due to rain. The rescheduled work also will be contingent upon dry weather.

To add or remove your name from the Under Construction email list, please send your request to [cdonahue@sanbag.ca.gov](mailto:cdonahue@sanbag.ca.gov) or call 1-866-HELP-210. This bulletin is a feature of the Route 210 Public Information and Safety Program. **Safety, It's No Accident!**

## Lane restriping helps traffic flow in Rialto

Route 210 construction crews re-striped turn lanes at key intersections along the Highland Avenue detour to improve the flow of traffic through the area.

At the intersection of Riverside Avenue and Highland, the middle lane on Highland was re-striped to allow turns both north and south on Riverside.

At the Easton Street/Ayala Drive intersection, Ayala was re-striped to allow travel both south and west.

SANBAG and Rialto officials are continuing to monitor travel along the detour.

## State Street work to start soon

Work on the State Street storm drain is scheduled to start in early April.

The storm drain, which will help divert water from the freeway and improve local drainage, will require the installation of 10-foot pipes beneath the street.

The first stage of work will require the closure of State between Highland Avenue and Lincoln Avenue. Drivers can use California and Macy as detour routes.
